

Department of Laboratory Medicine - Results Portal

GOSH Link is a browser based Portal for the review of results, reports and other patient data stored in the **Epic** repository.

The portal provides –

- an external, secure review of results by Health Care Providers (HCPs)
- Access is granted by registration and creation of a user account on **GOSH Link**
- secure access to allow HCPs to review their results or the results of their practice (multiple HCP practices) as part of registration and security set-up

Please See the Quick Start Guide for more information on how to use the system and browser compatibility.

Please complete the form below and return it to GOSHLink@gosh.nhs.uk. This request form should ideally be completed by the Laboratory Manager or equivalent of the establishment seeking access. A valid departmental NHS.Net email account is required, as this will not only form the user log in, but will be used as the primary mode of contact.

Please supply all information requested below so that the system managers can identify your establishment and accurately configure your account.
